

Professional Summary

Computer Information Systems graduate with practical experience in Business Analysis, Data Engineering, and Data Analytics through academic projects and professional training. Completed the Data Engineering on Google Cloud Bootcamp at Tuwaiq Academy and developed cloud-based data pipelines using Google Cloud technologies. Interested in business process improvement, data-driven decision-making, and Agile project environments.

Education

Princess Nourah bint Abdulrahman University, Riyadh, Sept 2020 to Jun 2024
Bachelor of Computer Information Systems

Training & Experience

Tuwaiq Academy, Riyadh, Apr 2026 to May 2026

Data Engineering Bootcamp

- Built end-to-end data pipelines using Google Cloud services.
- Processed and transformed datasets using Apache Beam and Dataflow.
- Designed workflows and loaded data into BigQuery.
- Developed a Smart Traffic Data Pipeline project for real-time traffic analytics.
- Created dashboards and visualizations using Looker Studio.

Al-Watan Medical Complex, Oct 2024 to Feb 2025

Information Systems Assistant

- Maintained and updated patient information within hospital information systems.
- Ensured data accuracy and completeness across electronic records.
- Supported administrative operations through data management and system usage.
- Assisted in maintaining organized and accurate digital information.

Ministry of Justice, Jan 2024 to Mar 2024

Business Analysis Intern

- Analyzed business processes and system workflows.
- Assisted in documenting business requirements and operational procedures.
- Participated in reviewing system functionalities and business needs.
- Gained exposure to digital transformation initiatives and information systems.

Projects

Smart Traffic Data Pipeline

Technologies:

Google Cloud Platform (GCP), Apache Beam, Dataflow, BigQuery, Looker Studio

- Developed an end-to-end traffic data pipeline to process and analyze traffic data.
- Built scalable cloud-based workflows for data transformation.
- Generated real-time geospatial insights through interactive dashboards.
- Improved accessibility and visualization of traffic analytics data.

Mutim System (Graduation Project)

Technologies:

XAMPP, Visual Studio Code

- Developed a system to assist customs authorities in classifying and processing products entering Saudi Arabia.
- Collaborated with a project team to improve workflow efficiency.
- Reduced processing errors and enhanced operational accuracy.
- Contributed to system analysis, development, and testing activities.

Skills

Business Analysis | Requirements Gathering | Scrum Framework | Data Analysis | SQL | Power BI | Looker Studio | Microsoft Excel | Google Cloud Platform (GCP) | BigQuery | Apache Beam | Dataflow | Data Visualization | ETL Pipelines | Python

Certifications

- Data Engineering on Google Cloud Bootcamp – Tuwaiq Academy
- Data Science – Learning Space
- Scrum – Tuwaiq Academy
- Predictive Analysis – Hadaf
- Mathematical Formulas for Data Analysis – Hadaf
- AI Skills 4 Women
- Fundamentals of Artificial Intelligence – SDAIA
- Misk Startup School Masterclasses

Languages

Arabic (Native), English (Professional Working Proficiency)

Memberships & Activities

Google Developer Student Club (GDSC) Core Member (2022–2023)

Participant in technology and innovation activities and workshops (70+ hours)
